### **DETAILED ACTION**

The terminal disclaimer filed on August 03, 2004 disclaiming the terminal portion of any patent granted on this application, which would extend beyond the expiration date of U.S. Patent 6,657,131 has been reviewed and is accepted. The terminal disclaimer has been recorded.

### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Andrew Delizio (Reg. No. 52,806) on October 11, 2004.

The application has been amended as follows: to overcome the references cited.

Cancel claims 1, 4-9, 12, 24, 32-37, and 40 without prejudice.

Claim 13, line 1, "The retention mechanism of claim 12" should be –The retention mechanism of claim 11—for proper dependent claim.

Claim 15, line 1, "The retention mechanism of claim 12" should be –The retention mechanism of claim 11—for proper dependent claim.

Art Unit: 2841

Claim 11, line 23, after the circuit board" please, insert --; the mechanism further comprising a connector interposed between the integrated circuit package and the circuit board--.

Claim 23, line 22, after the circuit board" please, insert --; the mechanism further comprising a connector interposed between the integrated circuit package and the circuit board--.

***Allowable Subject Matter***

2. Claims 10-11, 13-15, 17-23, 25, and 38-39 (renumber claims are 1-15) are allowed.

The following is an examiner's statement of reasons for allowance: the references cited disclose a retention mechanism comprising a dish-shaped elastically deformable pressure plate having a first apex and a first periphery, a dish-shaped elastically deformable backing plate having a second apex and a second peripheral, a fastener (which is a means for function) to apply forces to the first and second peripheries to engage an integrated circuit package and a circuit board, and some other claimed elements. However, they do not disclose or render obvious in combination of the mechanism having the back plate being in contact with the circuit board, the circuit board having a back side, and the second periphery of the back plate is to enable a plurality of components attached to the back side of the circuit board, after the integrated circuit (IC) package has been mounted to the circuit board (claims 10, 38-39),

Art Unit: 2841

and the mechanism further comprising a connector interposed between the IC package and the circuit board (claims 11, 13-15, 17-23, and 25).

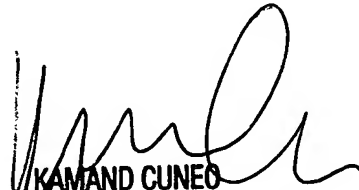

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
